Details of any experience in specialist interests or complementary therapies not implicit in CV entries:

--

Would you please describe how your interest in osteopathy developed and how you would expect the course to alter your professional practice and career:

--

Names, addresses and status of two professional referees:

1)	2)

Declaration;

I understand that, should this application be successful, my admission to the course will be conditional on my agreement to abide by college rules.

A clear Disclosure and Barring Service check (previously a CRB check) is a condition prior to starting the course, the cost is the responsibility of the potential student, application is made through the college administrator. For non UK applications either a similar check should be supplied, except if you are applying for a student visa when similar checks are part of the visa application process.

I do/do not have a disability to declare. If you have a disability please state below.

I do/do not have a health problem that may impact on learning practical manual skills, either as a therapist or as a subject. Please give further information below, if you are unsure whether a health problem is relevant to the course please discuss with one of the Course Directors.

I declare that I have no current or past conditions or formal investigations into my medical registration with GMC or equivalent professional body or association or college.

I consent to any previous employer or colleague providing information that the College may need to be assured of my fitness to take the MLCOM course and practise osteopathic medicine.

I agree to give LCOM any details in change of address, contact details or next of kin whilst attending the college. In addition, if I normally live outside the UK, then I will supply and update this address and contact details in the UK as well as address and contact details in my country of origin. This requirement of overseas students is part of the regulations of the UK Border Agency.

I agree to pay the fees for the course, with initial payment of £5500, further payments after six months can be paid in two lump sums of £2500 at six and twelve months after the initial payment, or in monthly standing order of £416.66 over 12 months. All fees are payable to Osteopathic Association Clinic.

I understand that obtaining the MLCOM does not automatically entitle me to register with the General Osteopathic Council, and separate application is made to the regulator.
